# Evacuaid Emergency Bracelet

Manual alarm button for increased security

Powerful 90dB alarm at 3 m distance

Highly visible red LED warning lights

Evacuaid attaches to the wrist so that you have access to both hands

Automatic activation suited for high-stress situations

Never a false alarm – Evacuaid is only active when attached to the arm

Requires no maintenance

Highly sensitive motion sensor for automatic alarm

Long battery lifetime

Powerful LED torches to show the way out and locate others

Robust design / IP67 waterproof

The combination of light and sound has proven to be a lifesaver for many years. The Evacuaid emergency bracelet is based on this principle and specially designed so that employees get a tool that is useful and lifesaving in high risk situations. Evacuaid is a unique emergency bracelet for everybody who wants a safer, faster and easier evacuation.

The special feature of this bracelet is that it does not require any switch for activation. It activates automatically once it is strapped to the wrist. The alarm can be manually activated or the alarm will automatically sound if the person becomes unconscious making it easier to locate the person.
